

MATTHEW EGBEDOKUN

FrontEnd Web Developer

Address Lagos, 100001

Phone +2349031849620

E-mail jimatth121@gmail.com

I'm a front-end developer with a passion for building beautiful, functional, and user-friendly web experiences. I love the challenge of turning designs into interactive, high-performing applications using modern tools like JavaScript, React, Next.js, and Tailwind CSS.

For me, coding isn't just about writing lines of code it's about crafting seamless experiences that feel intuitive and effortless for users. I enjoy optimizing performance, solving tricky bugs, and constantly learning new ways to improve the way people interact with the web.

Whether working solo or as part of a team, I bring a problem-solving mindset, attention to detail, and a drive to create something meaningful. I thrive under tight deadlines and take pride in delivering clean, efficient, and scalable code that keeps evolving with the latest technologies.

Project

Kunda Kids Web App

Kunda Kids Web App is designed to enhance children's literacy through interactive features like educational games, quizzes, videos, and storybooks. The app uses a responsive user interface (UI) for accessibility across tablets, laptops, and desktops. Built with React and JavaScript, it focuses on an engaging user experience (UX) with age-appropriate content. The app also incorporates cloud storage for seamless content delivery, real-time learning progress tracking, and customizable user profiles to meet each child's needs. With gamification, multimedia, and adaptive learning algorithms, <https://web.kundakidsapi.com/>

Mira Hpro

Mira HPro is an Enterprise Hospital Management System (EHMS). It is a web application and can run across multiple platforms. The System is designed to provide the best user experience and also provide the hospital with the capability to manage out-patients, in-patients, diagnostics, process inventory, accounts, consultation, dispense drugs and manage personnel. With Mira HPro, hospitals, clinics, laboratories and other medical institutions can digitally access and process centrally integrated patient data.

SysBaker EE

SysBaker EE is a microfinance banking software that automates financial operations for microfinance institutions. Built with React and Node.js, it offers features like account management, loan processing, and transaction tracking.
